

Imagination Land – 10/21/21

Pathogen	Public Health Concern	21-day Average	7-day Average	Status	Cumulative Count	First Detected
COVID-19	No	24.0	26.0	Increasing	19	10/13/21
Hep A	No	7.5	8.6	Increasing	6	10/15/21
Hep B	No	2.5	2.9	Increasing	2	10/20/21
Influenza	No	1.2	1.4	Increasing	1	10/18/21
Malaria	No	3.8	4.3	Increasing	3	10/15/21
Measles	Yes	2.5	2.9	Increasing	2	10/20/21
Mumps	No	8.8	10.0	Increasing	7	10/14/21
Pertusis	No	1.2	1.4	Increasing	1	10/20/21
TB	No	8.8	10.0	Increasing	7	10/14/21

Concern: based on UNHRC; Cumulative 21- and 7-day averages are per 100,000; COVID cases were identified through a combination of screening all Afghan guests upon arrival, serial COVID screening (XX% of guests per week), testing symptomatic guests who present to the clinic, and serial testing of family members isolating with confirmed COVID cases. Consequently, incidence rates of COVID cases per 100,000 guests at Safe Havens should not be interpreted the same as community rates throughout the United States.
